

REACH Compliance Statement update

20/06/2023

At Magnet Sales and Service Ltd, we are fully dedicated to upholding environmental, social, and ethical responsibilities. As part of our commitment, we ensure compliance with the regulations outlined in REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals). REACH was implemented by the European Union on 1st June 2007 and is overseen by the European Chemicals Agency (ECHA). Its primary objective is to mitigate the potential risks posed by chemical substances to both human health and the environment.

As of the latest update on 16/06/2023 by ECHA, there are currently 235 substances of very high concern (SVHC) on the candidate list.

Magnet Sales and Service Ltd has conducted thorough audits of our products, processes, and those of our suppliers against the updated priority list. We can confidently confirm that none of the substances or entries listed are utilized in the manufacturing of our products at levels exceeding 0.1% by weight, in quantities surpassing one ton per year. Furthermore, our procedures do not involve the deliberate release of substances of very high concern.

We are committed to remaining vigilant in monitoring updates to the ECHA's candidate list of SVHCs. Consequently, we will continue to adapt our procedures accordingly, ensuring ongoing compliance.
